EPILEPSY WARNING

WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may include undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game - dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement or convulsions - IMMEDIATELY discontinue use and consult your physician before resuming play.

Introduction

Welcome to the fast-paced casino capital of Las Vegas, Nevada — home of the premier casino, Caesars Palace! Now you can sharpen your skills and practice your poker face in the privacy of your own home with your Sega Genesis and the CAESARS PALACE cartridge. Filled with the most popular games, CAESARS PALACE has everything a High Roller could ask for: Black-jack, Roulette, Craps, Keno, Slots, Video Poker, and Video Horse Racing!

Getting Started

Set up your Sega Genesis System as described in its instruction manual. Plug in control pad 1. CAESARS PALACE is for one player only.

Ensure the power switch is OFF. Then insert the CAESARS PALACE cartridge, its label facing towards you, into the console and press it down firmly.

Turn the power switch ON. After a few seconds, the Sega Screen will appear. When the Title Screen appears you may press any button to enter the casino.

IMPORTANT! If the Sega Screen does not appear, turn the Power Switch OFF. Ensure your System is set up correctly and the Cartridge is properly inserted. Then turn the power switch ON again. Always ensure the power switch is turned OFF before inserting or removing the CAESARS PALACE Cartridge.

TAKE CONTROL!

Overview of Controls

In **CAESARS PALACE** you will use the Directional button to move your character around the casino. Once your character is near a desired casino game, press any of the A, B, C, or START buttons to begin the game.

You will receive financing for your gaming spree by accessing one of the many ATM machines found throughout the casino. Instructions for creating an account are located in the *Using the ATM Machines* section which appears later in this manual.

To end your game at any time, you may leave the casino by moving your character to the front door and then pressing the B button. Alternatively, you may simply turn off the power switch on your Sega Genesis system and remove your **CAESARS PALACE** cartridge.

While sitting at a casino attraction, the D (Directional) button will be used to move the hand icon around the screen. The B button will be used primarily for placing bets and activating game functions. The C button will display the chip rack when appropriate. Pressing START and up on the D button will display help for any of the casino games. Pressing START and down on the D button exits the game you are currently playing and will return you to the casino floor.

The specific controls for each game are as follows:

SLOT MACHINES:

The C button will bring your chip rack to the screen. Pressing the C button again will remove the chip rack. When the hand icon is moved to the coin insertion area or the arm of the slot machine, press the B button to insert coins and to pull the arm of the Slot machine. Pressing START and up on the D button provides help with slots.

VIDEO POKER:

The C button will display your chip rack. Pressing C again will remove the chip rack. The B button is used to insert chips in the coin slot, deal cards and select which cards to keep. Pressing START and up on the D button provides help with Video Poker.

BLACKJACK:

The B button picks up chips from the chip rack and drops them on the table. You can press the B button while the

hand icon is displayed over the betting circle, and you will continue to drop chips. Press any other button to start the dealing. Once the cards have been dealt, press the A button to "hit," or the C button to "stand." (Hitting and standing will be explained later in the manual.) Pressing START and up on the D button will display help on Blackjack.

ROULETTE:

Press the C button to toggle the display of your chip rack on and off. The B button is used to pick up chips from the chip rack and to place bets. Press the A button to start the Roulette wheel spinning. Pressing START and up on the D button will display help on Roulette.

CRAPS:

Press the C button to toggle your chip rack on and off. Press the B button to pick up chips and to place them on the betting table. Pressing A will roll the dice.

KENO:

Press the B button to choose the amount of money you wish to bet, and to select the numbers you wish to bet on.

HORSE RACING:

Press the B button to select the various keys on the horse racing video terminal.

Using the ATM machines

To use an ATM machine, use the controller to move your character to the ATM machine. Press any button to display the ATM machine screen. Use the D button in conjunction with the B button to make the hand icon press any of the buttons shown

SETTING UP AN ACCOUNT:

To set up an account, move the hand icon to the button next to the **NEW ACCOUNT** option and press the B button.

You will be asked to enter your name by using the keyboard on the screen. To select a letter, move the hand icon to the letter you wish to choose, and press the B button to select it. If you make a mistake, move the hand icon to the back-space key (arrow facing to the left) and press the B button. When your name has been entered correctly, move the hand icon to the OK button and press the B button one last time.

You will be given a password to enable you to save your information and access it later. This also prevents other people from spending your money! Write down your password and guard it carefully.

After you have entered your name and received your password, you are ready to start some serious casino gaming! To save your progress at any time, go to any of the ATM machines located throughout CAESARS PALACE and select the PASSWORD/EXIT option to receive a new password that saves your new information.

ACCESSING A SAVED ACCOUNT:

To access a previously saved account, enter your password on the first ATM machine screen, using the D button and the B button to move the hand icon and select the letters and numbers contained in your

password. Note: Passwords do not contain vowels.

CHECKING YOUR BALANCE:

You may also check your balance by using the ATM machines. Once you have entered your password and received a new account, you may select the balance option from the first ATM machine screen.

PLAYING A SCRATCHER:

You may also use the ATM machine to play a scratcher. The cost for each game is \$100, which is automatically deducted from your account.

The following scratchers are available at all ATMs.

60 YARD FIGHT: The object of this game is to scratch off one space from each yard line, starting at the 10 yard line and working your way up to the 60 yard line. Under each scratch area is a money amount or a bomb. To scratch an area, move the hand icon to the square you wish to scratch and press the B button.

If you scratch off a bomb, the card is void. As you move from the 10 yard line to the 60 yard line, the amounts increase, but so do the number of bombs. At any time before a bomb appears you may collect your current winnings. The winnings amount is the amount shown on the last line you've scratched off. The amounts do not accumulate from line to line.

When you have either lost or decided to collect your winnings, you will be given an option to press the B button to scratch off the entire ticket. Press the START button to exit back to the ATM machine screen.

MATCH TWO: This card features a grid of twenty five scratch squares. Under each square lies a bomb or a dollar amount. To scratch off a square, move the hand icon to the square of your choice and press the B button. The player keeps scratching off squares until two matching dollar amounts are revealed (at which point you immediately win the matching amount) or until a bomb appears, which voids the card.

TRIPLE JACKS: There are fifteen scratch squares on this card. The dealer's hand is shown in the upper left corner of the card. The object is to beat his hand, or get a winning combination of card values. If you beat the dealer's hand, you win \$150. If you get a pair, you'll win \$200. Three of a kind nets \$300, while a three card straight gets \$400. Should you be lucky enough to scratch off three jacks, you'll win \$5,000! If you uncover a bomb, the card is void.

To scratch off a square, move the hand icon to the square of your choice and press the B button. Once

the game has been completed, you may see the entire card by pressing the B button. Press the START button to return to the ATM machine screen.

Chip Rack

For many of the casino attractions at Caesars Palace, you will need a chip rack to place bets and make your own change. While playing Roulette, Slot Machines, Video Poker, Horse Races, or Keno, you can access your chip tray and make change by pressing the C button to bring your chip tray on-screen. To remove the chip tray when you are

finished making change or selecting the denomination you wish to bet with, press the C button again.

The chip tray holds 24 chips of each denomination. If you have more than 24 of any denomination, they will not be visible, but your excess coinage is stored and will reappear when you drop below the initial 24 chips.

To make change, move the hand icon over a stack of chips and press the B button to pick one up. Move the hand icon to another chip column and press the B button again. If you take a chip from the \$100 column, and move it to the \$25 column, you will have one less \$100 chip, and four more \$25 chips. You may also move one of your \$5 chips to the \$25 column. This will remove five of your \$5 chips and add one \$25 chip.

Slots

Upon seating yourself at one of the many Slot Machines accessible throughout CAESARS PALACE, you'll be shown the payoffs for that machine. Each Slot Machine has a different denomination and can be accessed on both sides (the front and the back). While there are different denominations for each machine, the payoff numbers are the same.

To insert a coin, move the hand icon over to the coin slot. Your hand icon will change from a pointing hand to a hand holding a coin of the correct denomination for that machine. Press the B button to insert the coin. You may insert up to three coins on any Slot Machine. To pull the arm down, move the hand icon to the arm on the right side of the screen and press the B button.

There are three types of Slot Machines: Jackpot Jungle, Champions and Home Run.

JACKPOT JUNGLE:

The Jackpot Jungle machines feature three wheels containing bars, cherries, sevens, and Jackpot Jungle markers which act as wildcards, matching surrounding markers. There are three pay lines. Each coin you insert will light up another pay line. Payouts are paid on each pay line separately. The payouts are as follows.

3 Jackpot Jungle on the 1st pay line	2000 coins
3 Jackpot Jungle on the 2nd pay line	2000 coins
3 Jackpot Jungle on the 3rd pay line	2000 coins
3 Sevens	200 coins
3 Single Bars	80 coins
3 Double Bars	40 coins
3 Single Bars	30 coins
3 Cherries	10 coins
3 Ring Bars	5 coins
Any 3 cherries	3 coins
Any 3 Cherry	2 coins

CHAMPIONS

This game features three wheels containing champion belts, bells, red and blue sevens, referees, and boxing gloves. There is one pay line on the machine, although the payouts are better when wagering three coins. In addition, the appearance of a champion belt advances the round indicator, progressively increasing the payoff for three-coin bets.

Depending on the round and the coin wager, the payouts are:

	1st Coin	2nd Coin	3rd Coin
Any Champ Belt	4 Coins	8 Coins	11 Coins
3 Referee Hats	20 Coins	20 Coins	20 Coins
3 Bells	10 Coins	100 Coins	100 Coins

For three-coin wagers, the following payoffs are:

	Reel 1-3	Reel 1-2	Reel 1-1	Reel 1
3 Blue Sevens	200 Coins	200 Coins	200 Coins	200 Coins
3 Red Sevens	200 Coins	400 Coins	400 Coins	1000 Coins
3 Knockouts	1000 Coins	2000 Coins	2000 Coins	5000 Coins

The current round is displayed under the 'Slot machines' center wheel.

HOME RUN

The Home Run machines also feature three wheels containing sevens, bars, and special items. The special items are Clown, Double Jackpot, Triple Jackpot, and Home Run markers. There is one pay line on the Home Run machine, but the payoffs are greater depending on how many coins you insert.

to a maximum of three coins. The payoffs are:

	1st Coin	2nd Coin	3rd Coin	Home Run!
1	Clown	Double Jackpot	Triple Jackpot	Home Run!
2 7's and 1	40 coins	100 coins	100 coins	100 coins
2 triple bars and 1	50 coins	100 coins	150 coins	200 coins
2 double bars and 1	20 coins	40 coins	60 coins	80 coins
2 single bars and 1	10 coins	20 coins	30 coins	40 coins
1 long bar and 1	5 coins	10 coins	15 coins	20 coins
Nothing and 1	2 coins	4 coins	6 coins	8 coins

To see the payoffs, move the hand icon up using the D button. At any time you may press the START button, and down on the D button to leave the machine and return to the casino floor.

Blackjack

One of the most popular casino games worldwide, Blackjack originated in France. The object of the game is to obtain a total hand value nearer to 21 than the dealer's hand, without going over 21. Your bet is placed before the deal and must meet or exceed the table minimum. Throughout CAESARS PALACE, you'll find Blackjack tables

with varying minimum and maximum bet amounts. After you have placed your bet, two cards are dealt to you. Cards are added, if desired, until you decide to stop or until you go over 21 (called a "bust.") If you obtain a "Blackjack" with any initial hand containing an Ace and any 10-point card (Ten, Jack, Queen, or King), the payoff is one and one half times the original bet. All other wins are paid one to one.

When you sit down at a Blackjack table, you will be given the minimum and maximum amounts allowed for any one hand. If you do not bet at least the minimum amount, the dealer will not deal the cards and a message will appear informing you that your bet does not meet the table minimum. If you attempt to bet more than the maximum amount allowed, you will not be permitted to do so.

TO BET: To bet, move the hand icon to the chip rack and select an appropriate denomination. Press the B button to pick up a chip. Move the hand icon to the betting circle on the table and press the B button a second time to drop the chip.

You may continue pressing the B button to drop additional chips without returning to the chip rack. The cards will be dealt once you have stopped placing your bet, or when you have pressed the A, C, or START button.

The dealer will deal you two cards face up, and two cards to himself, one face up and one face down. To receive another card, referred to as "hitting," press the A button. If you are happy with your hand and do not wish to be dealt another card (referred to as "standing,") press the C button.

TO SPLIT: If you are dealt a pair, you may split the cards into separate hands by placing a bet of an equal amount (to the original bet) approximately one inch to the right of your first bet. The single cards are now treated like separate hands, and you must play out both hands. Any two face cards may also be split, because the point values for each are equal. You may split up to three times during a single round: once if you are dealt a pair or two face cards and once on each of the two hands you now control, providing you are dealt pairs a second (and third) time.

When splitting pairs of Aces or 10-point cards, any resulting "Blackjack" hand is paid at regular odds and not 3 to 2, because the initial hand (which was split) did not constitute a "Blackjack" hand.

TO DOUBLE YOUR BET: Regardless of the total value of your hand,

you may opt to double your bet. To double, place a bet equal to your original wager just to the right of the original bet. There is only one catch: when you double, only one card will be dealt to you and you must stand with the hand as it is.

BUYING INSURANCE: You will be offered insurance when the dealer has an ace showing which signifies that he might have Blackjack. To place an insurance bet, place your bet on the insurance line. If the dealer does have Blackjack, his cards will be turned over and your original bet will be lost. However, you will receive a payoff of one to one on your insurance bet. If the dealer does not have Blackjack, your insurance bet is lost and the hand continues.

To exit back to the casino floor, press the **START** button and down on the **D** button.

Video Poker

The first thing you'll notice when you sit down to play video poker is that the payouts can be pretty high — as long as you risk five coins.

To play, press the **C** button to access your chip rack. Press the **B** button to pick up a chip. Move the hand icon using the **D** button to the coin slot and press the **B** button to add chips, up to a maximum of five. If you wish to play less than five chips, move the hand icon to the button below the coin slot and press the **B** button to have a fresh hand dealt.

Under each card is a red button. To hold a particular card, move the hand icon to the red button below it and press the **B** button. When you have finished marking the cards you wish to hold, move the hand icon back to the button under the coin slot and press the **B** button. New cards will be dealt for each card you

did not mark to hold. To win in Video Poker, you must have one of the following hands, ranked in order of highest to lowest:

Royal Flush (Ace, King, Queen, Jack, and Ten of the same suit)

Straight Flush (Five cards in sequence in the same suit)

Four of a Kind

Full House (three of a kind and a pair)

Flush (any five cards of the same suit)

Straight (any five cards in sequence of varying suits)

Three of a kind

Two pairs of any cards

A pair of Jacks, Queens, Kings or Aces

To leave video poker and return to the casino floor, press the START button and down on the D button.

Roulette

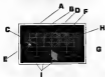

You will never see a casino without a Roulette Table and CAESARS PALACE is no exception. One of the best features of Roulette is the variety of betting options available to the player.

The game involves 38 positions on a wheel, consisting of numbers 1 through 36, 0 and double 00. Half of the numbers are red and the other half are black. The 0 and 00 are green. There are nine different types of bets with various payouts.

Each type of bet and its correct placement on the board is shown below:

Type of bet	Where to bet	Payout
A	A single number	35 to 1
B	Two numbers	17 to 1
C	Three numbers	11 to 1
D	Four numbers	8 to 1
E	Five numbers	6 to 1
F	Six numbers	5 to 1
G	Column of twelve numbers	2 to 1
H	Two/for numbers	2 to 1
I	Red/Black, 1-18, 19-36, Odd/Even, or Zero/non-zero on the bottom of the table	1 to 1

To place your bet, press the C button to access your chip rack. Press the B button to select the appropriate betting denomination. Press the C button to remove your chip tray from the screen and move the hand icon to the area on the table on which you would like to

place a bet. Press the B button a second time to drop the chip. You may place up to fifty separate bets on the table.

Use the D button to move the hand icon around the table to see parts of the Roulette Table which are not visible from the main game screen.

Once the wheel has stopped spinning and a winning number has been found, press any button to have losing bets removed and winning bets paid off. All winnings are placed back in your chip rack automatically.

For each Roulette Table, there are minimum and maximum bets. Basically, each bet amount must equal or exceed the table minimum without going over the table maximum.

Press **START** and down on the **D** button to leave the Roulette table and return to the casino floor.

Craps

The object of Craps is to guess the roll of the dice before it is thrown. The game is played with two six-sided dice; thus, the result from the throw of the two dice can be any number between 2 and 12.

TO BET: You will place your bet before the dice are thrown. Press the **C** button to access your chip rack. Press the **B** button to select a chip. Press the **C** button again to remove your chip rack, and move the hand

icon to the area on the table on which you wish to place your bet. Press the **B** button to place your chip on the table.

You may add chips to your original bet by continuing to press the **B** button. When you are ready for the dice to be thrown, press the **A** button.

Below is a breakdown of the dice throw rankings (on the first throw):

“Throwing a 2, 3, or 12 on the first dice roll is called “Craps” and is a loser. The current “shooter” must retire and control of the dice is passed to the next player. Throwing a 7 or 11 is called a natural and is a winner. Throwing a 4, 5, 6, 8, 9, & 10 are point numbers. To win, the point number must be thrown again before a 7 is thrown.

“The first roll of the dice is called a “come-out” roll. A result of 7 or 11

is an instant winner, results of 2, 3, or 12 is an instant loser. If the result is any other number, the game continues without a winner or a loser until the same point-number is rolled (which is a win) or a 7 is rolled (which is a loser). Any result besides a 7 or the point number has no bearing on the continued rolling of the dice by the current "shooter."

Below is a list of the possible bets that may be placed on the come-out roll:

- A. The "Point Numbers" (4, 5, 6, 8, 9 & 10) are located on the upper portion of both sides of the Craps table. Regardless of the point number that is rolled on the come-out roll, you will win if the number you bet on is rolled again before the original come-out roll point number or the number 7 appears.

You may also bet against any point numbers being rolled a second time before the appearance of the number 7. Such bets are placed on the lowest box just above the point numbers. If a 7 is rolled before the point number, you've wagered against, you win!

- B. The "Field" is located roughly in the center of both sides of the table. This is betting on a roll of 2, 3, 4, 9, 10, 11 or 12.
- C. The "Pass" line is located toward the bottom of each side of the table. A Pass Line bet on the come-out roll wins automatically on a dice roll of a 7 or an 11. A roll of 2, 3, or 12 is Craps, and the Pass Line bet is lost. Any other result of the roll (4, 5, 6, 8, 9, or 10) will be the

Pass Line point, which must be repeated before a 7 is thrown. The dice continue to be thrown until Craps has been thrown, or the point number has been made.

- D. The "Don't Pass" line is located just above the Pass Line on both sides of the table. This bet means you don't believe the point will be made, and constitutes a bet against the "shooter." On the come-out roll, the Don't Pass bet loses on 7 or 11, wins on 2 or 3, and ties on 12. Any other number would be a point. For the Don't Pass to win, a 7 must be rolled before the point number is made.
- E. Any "Hardways" bet is placed in the center of the table. A Hardways bet is

betting that the result of the roll of the dice will be a pair of twos, threes, fours, or fives. On a come-out roll, any bets placed on a Hardways pair will be left there until the point number is made or until a seven is rolled, in which case it is lost. If the pair is rolled before either happens, you win!

- F. Any "One Roll Bets," also called "proposition bets," are located below the Hardways bets. This bet consists of a pair of ones, pair of sixes, a roll of three, or a roll of ten by rolling a six and a four. This bet may be placed at any time and is won or lost on the next roll of the dice.

The payoffs are as follows:

Any 7	1 Bet to you win	Page 9 to 1
Any Craps	2, 3, or 11 rolled, you win	Page 8 to 1
Acce	11-1 rolls, you win	Page 16 to 1
Twelve	12-1 rolls, you win	Page 16 to 1
Place Craps	11-2 rolls, you win	Page 16 to 1
Place	11-1 rolls, you win	Page 16 to 1

For placement, use the diagram below.

A white marker will designate the point number after a successful come-out roll. The white marker is placed over the number that is the point number. (Please Note: If the player is trying not to match the point number, a black marker will appear on the number instead of white.)

After the come-out roll, the remaining areas you may bet on are:

- G. The Come box, which is located in the center of both sides of the table. You bet on the Come area after a Pass Line point has been established. This bet is placed against the result of the next roll of the dice. Same rules apply as a Pass Line bet.
- H. The Don't Come box is located at the right and left top sides of the table. A Don't Come bet is the opposite of a Come Bet. If Come wins, Don't Come loses. A bet is placed here after the point is established. The bet is against the result of the next roll of the dice.

- E. An "Odds-bet" is made after the point number has been established. Odds-bets are placed directly behind the Pass Line bet area, but out of the Pass Line area. The advantage of an odds-bet is that you will receive a payoff that is directly taken from the actual odds of rolling a specific number.

For example, the odds of repeating a 6 or 8 before rolling a 7 is 6 to 5, and that is the payoff for an odds-bet on those two numbers. The remaining point numbers are as follows: 5 or 9 are paid 3 to 2, 4 and 10 are paid 2 to 1. The odds-bet is an additional bet that the point number will be reached before a 7 is rolled.

CAESARS PALACE calculates the payoffs against the original bet to the nearest ten-thousandths of a point. Actual payoffs are then rounded to the nearest dollar.

The odds-bet is one of the only bets the casino has no advantage in. Odds-bets are equal to your original bet unless you have configured Craps to allow double odds-bets, in which case it can be twice as much as your original bet.

All bets lost will be removed by the dealer after the dice have been thrown. Any winnings are returned to your chip tray automatically. Press the START button to leave the Craps table and return to the casino floor.

Keno

To view a Keno card, use the D Button to move your character to the Keno desk. Then press any button to view the card. Move the hand to the amount you wish to bet (shown at the top of the card) and press the B button to select it. If you make a mistake, simply move the hand to a different amount and press the B button.

Next, move the hand down to the numbers on the card and press the B button to select any number. A red "X" will be shown on each number you choose. You may choose up to 10 numbers. If you make an error, move the hand to the marked number you wish to unmark, and press the B button. The red "X" should disappear from that number.

When you have finished selecting numbers, move the hand to the DONE button on the screen, and

press the B button. Move down to the EXIT button on the screen and press the B button again.

You will be shown the results once the numbers have been selected, no matter where you happen to be within the casino, and you will be notified of any winnings you have amassed.

The payouts for Keno are as follows:

KENO BOARD

1 Number Matched					
Matched	\$1	\$2	\$3	\$4	\$5
Unmatched	\$1	\$2	\$3	\$4	\$5
2 Number Matched

Video Horse Racing

To log on to the horse racing terminals, move to the front of the video screens and press any button. You will see a video screen with three options: PLACE BET, VIEW STATS, and VIEW RACES. Move the hand to the red button next to the option you wish, and press the B button.

PLACING BETS: There are three types of bets you may place: Single, Quinella, & Trifecta.

A **SINGLE BET** is placed on one horse to either **WIN**, **PLACE**, or **SHOW**. If you select **WIN**, your horse must win the race in first place. To **PLACE**, your horse must come in first or second place, and to **SHOW**, he must come in first, second or third.

To place a bet, move the hand icon to the numeric keyboard on the bottom of the screen and using the D button and the B button, specify a wager amount.

Once this bet is selected, manipulate the hand icon to press the buttons on the screen next to the words WIN, PLACE, or SHOW. At this point, you will select your winning pony.

Once your bet has been placed, move the hand icon to the ESCape key and then press the B button to log off from the terminal.

A **QUINELLA BET** is placed on two horses. When you select this bet, you must choose two horses. You win if the two horses

you bet on come in first and second place, regardless of the order you chose them.

A **TRIFECTA BET** is placed on three horses, in the hope that they will finish the race first, second and third in the order they were selected.

Wherever you are in **CAESARS PALACE**, the results of the race will be shown to you, along with any winnings you have accumulated as a result of the race.

Both the Quiniella and Trifecta bets have different "pools" of money that are divided once the race has been completed among the winners for that race.

When a "TRIFECTA" ticket is purchased, for example, the price of the bet goes into the overall "win" pool for that race. After the race is completed, the pool is divided

among all the winning ticket holders, minus a small portion of the pool which goes to the state of Nevada and CAESARS PALACE . Consider a pool of \$100,000 where 10,000 tickets chose the correct horse to win. \$85,000 would be split 10,000 ways for a payoff of \$8.50.

The odds shown for each horse are the correct payoff amount, bearing in mind the portion which has been removed. The single bet pays off against the odds for the horse.

Note: You may bet up to \$9,999 on any one bet.

VIEW STATS: To see the statistics on the various race horses, choose this option, pressing the B button while the hand icon is over the button next to the VIEW STATS option. Choose the desired horse by moving the hand icon to the button on the screen across from its name and pressing the B button. You will be shown the number of races the horse has run, the number of races won, the number of races placed in, and the number of races shown in. Once you have finished, select DONE/EXIT to return to the main horse racing video screen.

VIEW RACES: This option gives results on past races, showing the first, second and third place winners. Once selected, move the hand icon over the button on the screen next to the option you wish to view and press the B button. A prompt will ask you for the race number. Use the numeric keyboard at the

bottom of the screen and the **B** button to type in the race number. Move the hand icon to the **OK** button on the screen and press the **B** button to see the results. Press the button next to the **LAST RACE** option to see the results of the previous race, and press the button next to the **NEXT RACE** option to see the next race results.

Hints & Tips

- ◆ Save your status often! Before you bet it all, be sure to stop off and get a new password as a little insurance.
- ◆ You might want to try building a good reserve of chips before betting at the tables with expensive minimum bets.
- ▼ If you are experiencing "bad luck" at a table or a machine, try a different one. You never know when a change in scenery might be the key to bringing you good luck and more riches!
- ◆ Bet conservatively! Stretch your bankroll out and you can enjoy casino gaming for a longer period of time. If you want to risk at all, be sure you've gotten a password for your balance first!

◆ When betting on the horses, don't go for the long shot! You might win big, but the odds are against you — unless you want to risk it all, bet on the horses with the lower odds.

**"HANDLING THIS CARTRIDGE"**

- The Sega Genesis Cartridge is intended for use exclusively with the Sega™ Genesis™ System.
- Do not bend it, crush it, or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional recess during extended play, to rest yourself and the Sega Cartridge.

**WARNING TO OWNERS OF
PROJECTION TELEVISION.**

Still pictures or images may cause permanent picture tube damage or track phosphor on the CRT. Avoid repeated or extended use of video games on the large screen projection television.
